Test Report

1.0 Test of Video Handler

1.0.0 Summary of testing

All of the tests for the TeachEasy XML warning were manual (visual) tests.

1.0.1 Prerequisites

TeachEasy file opening XML parsing capabilities should be completed

1.0.2 Test importance

Medium

1.0.3 Test results

Test Case	Expected Results	Obtained Results
Provide an XML file which contains warnings	A dialog box should pop up notifying the user of the presence of warnings and/or errors in the XML file.	Passed
“Show warnings” check box can be selected	Upon selection of the check box a list of the warnings/errors should be displayed on the same dialog box	Passed
The dialog box displaying the presence of warnings and/or errors should only be displayed if warnings and/or errors are present in the chosen XML file	The dialog box not to appear if no file is chosen	Failed. The dialog box appears if file->open is chosen and if the user then cancels the file opening.
Deselecting “Show warnings” check box	If the check box is deselected, the initially displayed warnings and/or errors should be hidden	Passed
Selecting the “Yes” button to continue	If only warnings are present in the XML file, TeachEasy should continue to open the file when the “Yes” button is pressed. However, if the file contains errors, the file opening shouldn’t continue	Passed
Selecting the “No” button to abort the file opening	If the “No” button is pressed after dialog box	Passed

	is displayed due to warnings and/or errors, the file opening should seize. The program should then return to the initial “No Lesson Open” page.	
Opening and XML file with no warnings and/or errors	The program should not display the dialog box notifying the user of the presence of warnings and/or errors	Passed

1.0.4 Changes made due to test

1.0.5 Additional comments on test

The dialog box is effective and carries out the intended tasks of displaying the warnings and/or errors present in and XML file. It is also capable of giving the user the option of opening a file which contains only warnings.
