# Test Report

## 1.0 Test of Answer Box Handler

### 1.0.0 Summary of testing

The tests being completed here will ensure the stability of the answer box handler and that any functions implemented work as intended.

### 1.0.1 Prerequisites

**Answer box handler must be complete**

### 1.0.2 Test importance

Low

### 1.0.3 Test results

Test Case	Expected Results	Obtained Results
Specify position to draw the answer box onto screen	Answer box should be drawn in correct location	PASS
Set character limit for answer box	User should not be able to exceed character limit	PASS
Assign marks to an answer box	Marks should be associated with answer box	PASS
Assign answers to the answer box	All correct answers should score the marks	PASS
Set retry boolean to false	Answer box should not be retry able	PASS
Define multiple answer boxes for a given page	All answer boxes should be drawn onto the page	PASS
Define an answer box which expects numerical answers	Numerical answers should be handled	PASS
Define a negative character limit (or 0)	Handler should default this value to 2	PASS
Set marks associated with an answer box to a negative value	Should default to zero not negative	FAIL – answer box gives negative marks for a correct answer
Enter correct answer but in upper case	Handler should notice that this is the same answer	PASS

### 1.0.4 Changes made due to test

### 1.0.5 Additional comments on test
